Objective A natural problem solver and dedicated software developer. Learns quickly, communicates well, and relentlessly pursues quality.

Relevant Experience

Full Stack to-do Web App

- Developed a full stack web app using a React.js front-end and Django-Rest-Framework REST API.
- Utilizes JSON data to dynamically load user's tasks.
- Includes a user-friendly user interface with animations and drag-and-drop functionality.

Website for Rodney M. Scott, Estate Planning & Elder Law Firm

- Developed and deployed a Django project to increase web traffic and improve efficiency for the law firm.
- Includes a PostgreSQL database to store relevant business information on AWS.

Console Game Engine

- Collaborated to create a Python based game engine that allows developers to easily create real-time console game with ease.
- Developed a Tetris game using the engine.

Game Mod

- Created a mod for Stardew Valley using C# and .NET so users could receive dynamically generated game information in a novel newspaper format.
-
